***Response to Arguments***

Applicant's arguments filed 1/22/10, with respect to the priority date have been fully considered and are persuasive. The Office Action of 10/23/09 has been withdrawn.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 6012004 to Sugano et al ("Sugano").

Regarding claims 1 and 2, Sugano teaches controllers for a heavy duty industrial vehicle (col. 1, lines 6 – 12), which are a plurality of controllers (11a, 11b, ..., 11n) provided in said heavy duty industrial vehicle equipped with a working machine for performing predetermined work, said plurality of controllers being adapted to control, independently of each other, a plurality of instruments to be controlled, including said working machine, said instruments being provided in said heavy duty industrial vehicle, and characterized in that a configuration of hardware of said plurality of controllers is entirely common and interconnected by a network (see figs. 1, 2, and 5 for the configuration of hardware of the controllers that are controlled by a common bus 10; note col. 4, line 59 – col. 5, line 30 at least).

***Allowable Subject Matter***

Claims 3 – 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. A statement of reasons supporting the allowable subject matter will be furnished in response to this Office Action.
